The delay in issuing the June number of "Trade in Grain Futures" has been due to the inability of some of the larger grain commission houses to submit correct reports for the last two days in June. The huge volume of trading during the last three weeks has been more than the clerical staffs of some of the firms could handle accurately.

In order not to cause further delay, we are issuing the report with notice to readers that the Chicago figures in Tables 1, 2, 3, 4, 7, 8, 9, 10, 13, 14, 16, 17, 19 and 20 are subject to correction for the reasons cited above.

Note: Because of the wide fluctuations in foreign exchange, which began September 21, 1931, and are still continuing, the Liverpool prices are calculated from the closing price of the pound sterling on the money exchange and the closing price of Liverpool futures on the grain exchange, while the Winnipeg prices are calculated from the closing price on the Winnipeg grain exchange and the discounts on Canadian currency as furnished by one of the large Chicago banks.

The following tables show the reported high, low and closing quotations on the pound sterling, together with the high, low and closing per cent discounts applied to Canadian currency:
